S

ource and methodology

All the figures published here are from European customs sources published by Eurostat.

Observation

1. Customs statistics make a distinction between intra and extra-European imports. Intra-European imports report trade and do not correspond to the real quantities available (double accounting with extra-EU imports is possible). Extra-European imports concern imports to the European Union from third countries (EU entry points).
2. Quantities from extremely remote regions (the four French overseas departments, Madeira, the Canary Islands and the Azores) have not been included in community imports since 1997.
3. The European Union had :
 - 12 member-countries: until 1994,
 - 15 member-countries: from 1994 to April 2004,
 - 25 member-countries: from May 2004 to December 2006,
 - 27 member-countries: from January 2007.

The 2009 and 2010 data provided in this yearbook cover EU-27.

4. All quantities are in tonnes.
5. The differences that may appear between the 2009 data published in the July-August 2010 issue of FruiTrop (No.180) and the 2009 data in the present supplement result from later readjustments by the European statistical services.
6. Country codes according to the official EU norm:
