

ACCREDITATION: MUTUAL BENEFITS FOR RESEARCH AND INDUSTRY

Evolution of the quality management at Wood Protection Laboratory

2 Partner in the EU 5th PCRDT project **PLYBIOTEST**

« Biological performances testing methodology to evaluate the durability on plywood as an indicator for exterior construction »

XP ENV 12038
Durability of wood panels

3 Pre-normative research on testing anti-termite barriers

XP X 41-542 Ageing test
XP X 41-550 Efficacy test

EN 73 & EN 84 Ageing tests
EN 113 Fungal test
EN 117 & EN 118 Termites tests

1 Requests from industry

4 Perspectives

EN 350-1 Natural durability test
XP CEN/TS 15534-1 Wood-plastics composite characterisation
XP CEN/TS 15669 Thermal modified timber characterisation
+ Method conception

The accreditation extension is still in progress in the the Wood Protection Laboratory of the CIRAD. Other standardized tests and the method conception activity should be accredited in the near future.
