# Conception d'un outil de gestion et. de visualisation des variables agronomiques

#### Julien HOARAU

Master 2 Informatique Université de la Réunion

Référent entreprise : Sandrine AUZOUX Référent université : Rémy COURDIER

- Introduction

#### **AEGIS** presentation

- Heterogeneous datasets
- complex and difficult to share
- Cirad
- Agro-ecology
- Information System
- Variables
- Biophysical
- Environmental

- Introduction
- 2 Environnement

### AEGIS, Information system

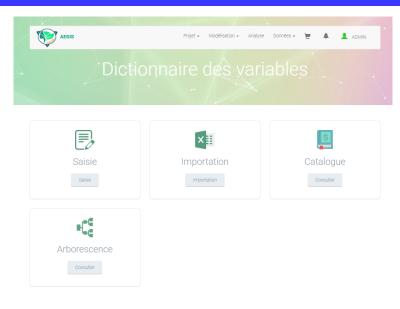

- Free framework
- Model View Controller

- Framework
- Styling HTML object
- Animation

 Relational and object database management system

#### Variables dictionary

- Travaux effectués

#### Data-visualization

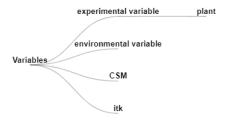

- Librairy
- JavaScript
- Data-visualization
- JSON

# Composition de la variable

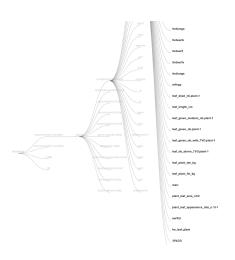

#### Variable

- Code variable
- Classe
- Sous-classe
- Domaine
- Trait
- Méthode
- Unité

### Arbre pliable

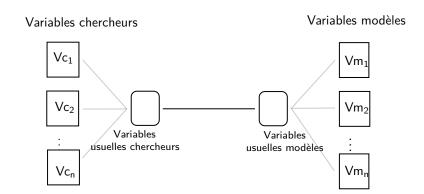

### Arbre déplié

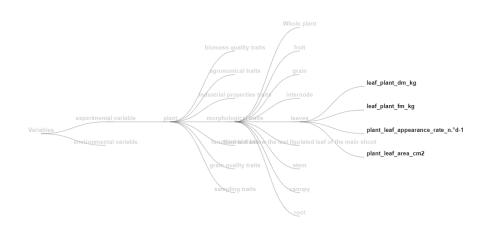

# Analyse des variables agronomiques

- Présence d'homonymes dans les variables (ex : lea\_area = leaf\_area\_index)
- Présence de doublons dans les variables (ex : lea\_area et lea\_are\_cm2 et lea\_area\_plant\_cm2)
- Erreur de saisie des variables ( ex : heigth et height).

#### Solution

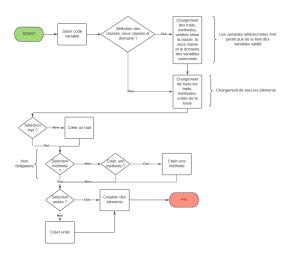

### Affichage de l'arbre avec les variables harmonisées

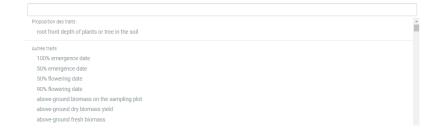

### Amélioration de la saisie des variables agronomiques

- Maintenir une cohérence.
- Diminuer les erreurs.

# Logigramme de la saisie des variables agronomiques

### Application de la suggestion d'un trait

#### Le rôle de la validation

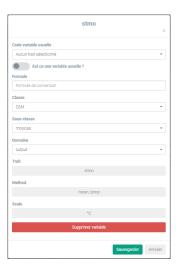

- Administrateurs
- Vérifier les variables
  - Modifier
  - Supprimer
  - ► Valider
- Enrichir la suggestion des composantes

### Interface de la page validation

#### Liste des variables en attente

| variable code               | Class                 | Subclass | Domain                 | Trait code     | Method code | Scale code | Date                | Author                |
|-----------------------------|-----------------------|----------|------------------------|----------------|-------------|------------|---------------------|-----------------------|

#### Interface de modification de la variable

- Perspectives
- Conclusion

#### Les futurs ajouts

- Mettre à jour l'importation et l'exportation des variables
- PhpExcel ⇒ PhpSpreadSheet
- Finir la partie Back-end de la page « Validation »
- Finir la partie Front-end de la page « Modélisation »

- Conclusion

#### Conclusion

- Ajouter une amélioration sur le dictionnaire des variables
- Expérience professionnelle
  - ► Réunion
  - Compétence

- Conclusion
- Mooc

#### Mooc

#### JavaScript (Document Object Model)

- Ajouter, supprimer, sélectionner
- Évènements d'écoutes
- Requêtes
- Data-visualisation, Filtres, fil d'Ariane

#### Serveur Linux

- Installer Apache et PHP
- Déployer le site web
