Plenary Lectures

Chinese Sugarcane and Sugar Industry Development in Recent Ten Years ................................................................. 3
Yang-Rui Li and Li-Tao Yang

Use of Bio-fertilizers in Sugarcane Agriculture in Brazil: Impact on Physiological Efficiency and Crop Productivity .... 9
Raffaella Rossetto

Climate Change Impact on Sugarcane Production in Developing Countries ............................................................ 11
Duli Zhao and Yang-Rui Li

Toward a Reference Impact Sequence of the Gene-rich Part of the Sugarcane Genome ........................................... 15
Olivier Garsmeur, Bernard Potier, Karen Aitken, Paul Berkman, Gaetan Droc, Carine Charron, Guillaume
Martin, Bandie Harrison, Edwin van der Vossen, Robert Henry and Angélique D’Hont

Transgenic Sugarcane: The Global Scenario ................................................................................................................ 16
Prakash Lakshmanan

How Can Sugarcane Improvement Take Advantage of Next Generation Sequencing Technologies? ................. 18
Anne L. Rae, Paul J. Berkman and Karen S. Aitken

Seedpiece Transmissible Diseases in Sugarcane and their Management ................................................................. 20
Jack C. Comstock

Addressing the Nitrogen Problem in Sugarcane Production ...................................................................................... 22
S Schmidt, R Brackin, C Paungfoo-Lonhienne, T Lonhienne, M Westermann, M Salazar, YK Yeoh, P Hugenholtz,
MA Ragan, M Redding, C Pratt, WJ Wang, B Granshaw, P Lakshmanan and N Robinson

An Insight into the Future of Brazilian Bioethanol Program .................................................................................... 25
Lee Tseng Sheng Gerald (DBV/CCA/UFSCar/Brazil)

Application of Selection Indices in Sugarcane Breeding Programs ........................................................................ 26
Phillip Jackson, Xianming Wei and Ting Luo

Climate variability Trends over the Past Five Decades at Two Sugar Producing Districts in Fiji ....................... 28
Jai S Gawander, Murari Lal, Pedro Rounds, Jyotika Prasad and Renil Kumar

Innovation and Technology Transfer: Key Factors to Improve Production and Sustainability ............................ 37
Fernando Muñoz and Alvaro Amaya

Sugarcane for Water-limited Environments: Challenges and Opportunities ............................................................ 38
Jaya Basnayake, Phillip Jackson, Sijesh Natarajan, Geoff Inman-Bamber Chris Stokes and Prakash Lakshmanan

Agro-technologies and Water Management to Sustain Sugar Cane Productivity in Iran ..................................... 39
Abdoreza Sayad Mansour

Determination of Site Specific Fertilizer Requirement of Sugarcane and Potato as Intercrop under Sugarcane
Based Cropping System ................................................................................................................................................ 40
SM Bokhtiar, S Islam, MS Islam, MA Haque, A Hasnat and KM Alam

Independently Segregating Simple Sequence Repeats (SSR) Alleles in Polyploid Sugarcane .............................. 46
Yong-Bao Pan Pingguo Liu and Youxiang Que

Improving Sugarcane Breeding Programs by Markers ............................................................................................ 53
Xianming Wei, Phillip Jackson and Emily Deomano

Biotechnology Applications in Sugar beet Breeding .............................................................................................. 55
Piergiorgio Stevanato

Development of Smut Resistant Varieties and their Economic Impact on Sugar Production in Australia ............. 57
R.C. Magarey, S. Bhuiyan, B.J. Croft and M.B. Cox

Emerging Sugarcane Diseases in Developing Countries .......................................................................................... 59
G.P. Rao
Tissue Culture Technology for Sustainable Cane Production ................................................................. 60
Upsorn Pliansinchai

The Challenges to Develop the First Commercial Transgenic Sugarcane .................................................. 61

Lorena Sereno, Anne-Marie Keijpers, Erich Stingle, Reinaldo Montrazi Barata, Enrico de Beni Arrigoni, Paulo de
Lucca and Alessandro Peligrinoschi

Sugar Industry in India and South East Asia: Potential and Prospects .............................................................. 62
S. Solomon

Strategies to Improve Sugar Production in Vietnam ....................................................................................... 67
Vo-Tong Xuan, Le Van Dinh, Nguyen Van Loc and Phm Hong Duong

Rehabilitation of Sugar Sector in Indonesia ...................................................................................................... 69
Aris Toharisman and Triantarti

Restructuring the Sugar Industry of Sri Lanka: Role of Sugarcane R&D ......................................................... 71
A.P. Keerthipala

Technical Session 1
Sugar Crops Production Technologies and Mechanization

Effects of Different Fertilizer Application and Planting Densities on Cane Yield of GT31 .............................. 77
Fang Tan, Lun-Wang Wang, Yan Jing, Hai-Rong Huang, Ting-Hua Li, Feng-Liang Yu and Hong-Wei Tan

Effect of Mung Bean Green Manureing on Soil Fertility and Cane Yield in Sugarcane ................................. 81
Wen-Bin Dong, Jin-Lan Xie, Wei-Zan Wang, Xiao-Yan Liu, Qiang Liang, Chang-Ning Li and Yi-Jie Li

Change of Polysaccharide Content and its Relation with Nitrogen Level in Sugarcane Leaves under
Nitrogen-Fixing Bacteria Inoculation and Nitrogen Supply ........................................................................ 84
Xi-Hui Liu, Hui-Ping Ou, Long-Zhang Yang, Long-Hua Zhang, Li-Tao Yang and Yang-Rui Li

Bio-manured Multi-ratooning Enhances Sugarcane Plant-ratoon System Productivity .................................. 90
T.K. Srivastava, K.P. Singh, Pushpa Singh and S. Solomon

Fractions and Bioavailability of Phosphorus in Acidic Soil of South China Sugarcane Areas ........................ 94
Jun-Hua Ao, Wen-Ling Zhou, Di-Wen Chen, Ying Huang, Yin-Lin Lu, Zhen-Rui Huang, Qi-Wei Li and Yong
Jiang

Effects of Plastic-Film Mulching on Yields of cane and Sugar in Sugarcane Grown in Arid Land .................. 98
Shao-Chun Liu, Yue-Bi Zhang, Jia-Wen Guo, Jing-Mei Dao, Jun Deng, Xin-Xiu Gao, and Zhi-Cun Fang

Impact of Hot Water Treatment on the Germination of Sugarcane Bud Chips .............................................. 101
Pei-Fang Zhao, Nilubon Taweekul, Taksinasansayavichai, Werapan Prongdee, Amarawan Tippayawat, Kanjana
Kirsak and Preecha Kapetch

Approaches to Implement Proper Varietal Proportions of Sugarcane in Guangxi .......................................... 105
Gai-Bo He, Ting-You Pang, Wen-Wu Huang, De-Bin Wei, Ying Xiang, Xuan Li and Fang-Mei Luo

Effect of Drip irrigation on Sugarcane and Sugar Yield .............................................................................. 108
Yi-ie Li, Wei-Zan Wang, Hong He, Shui-Ning Xu, Jin-Lan Xie, Tian Liang, Ya-Wei Luo, Qiu-Zhen Zhu, Qiang
Liang and Xiao-Yan Liu

Development Status of the Sugarcane Production in Yunnan Province ...................................................... 113
Jun Deng, Xing-xiang Yin, Xiao-cui Li, Ru-dan Li, Xian Fan, Juan Yan, and Yue-bin Zhang,

Yield Performance of Elite Sugarcane Genotypes Grown in Different Locations in Thailand ....................... 116

Dynamics of Deterioration of Fresh and Stale Cane Juice in Relation to Expression of Invertases and the
Growth of Leuconostoc sp ......................................................................................................................... 120

VISACANE, THE CIRAD QUARANTINE TOOL FOR THE EXCHANGE OF PEST AND DISEASE-FREE SUGARCANE GERMLASM

I. GUINET-BRIAL\textsuperscript{1}, J.-C. GIRARD\textsuperscript{1}, P. ROUMAGNAC\textsuperscript{1}, J.-H. DAUGROIS\textsuperscript{1}, E. FERNANDEZ\textsuperscript{1} AND P. ROTT\textsuperscript{2}

\textsuperscript{1}CIRAD, UMR BGPI, F-34398 Montpellier Cedex 5, France
\textsuperscript{2}University of Florida, Plant Pathology Department, Belle Glade, FL33430, USA

Abstract

Sugarcane varietal improvement requires the introduction of vegetative propagation material. The continued increase of international and intercontinental trade of plants has led to the enforcement of quarantine measures in many countries before the introduction of vegetatively propagated material because many plant pathogens can be carried and transmitted by them. Visacane is the CIRAD’s sugarcane quarantine (http://visacane.cirad.fr/en/). Visacane has been devoted to sugarcane quarantining for several decades. It covers detection of pests and pathogens, elimination of pests and pathogens, and transfer of plant material free of pests and pathogens. Besides phytosanitary constraints, this quarantine structure also takes into account legal constraints and ensures that plant breeders’ intellectual property rights over the transferred material are respected. Visacane can import and export varieties from and to most sugarcane growing countries in the world, ensuring that the material is free from any well-known important pest and disease causing agent.

Because it is integrated into a pathology research unit studying various aspects of plant-pathogen interactions, and thanks to its collaborations within a network of sugarcane technologists, Visacane can regularly update its expertise and propose plant material exhibiting the best possible phytosanitary quality.

Keywords: sugarcane, pathogen, detection, quarantine, transfer of varieties
